SUMMARY

Front End Developer with internship experience at Cod Soft, specializing in JavaScript, HTML, and CSS, and proven ability to create responsive and user-friendly interfaces. Successfully contributed to dynamic projects with a strong attention to detail and dedication to high-quality solutions. Skilled in collaborating effectively within team environments. Eager to utilize and expand expertise in innovative projects for personal and career growth.

PROJECTS

Blogging Website

- Designed using HTML, CSS, and a little bit usage of JavaScript
- Fully responsive website compatible with any device

To-Do App

- Crafted using HTML5, CSS3, and JavaScript
- HTML5 and CSS3 provide the foundation for structure and styling
- JavaScript brings life to the app through logic implementation

Simple Calculator

- Designed with HTML5 and CSS3
- Utilizes JavaScript solely for functionality

Expense Tracker

- Records item names and prices
- Displays them in a list format alongside the total expense amount

Weather App

- Real-time weather updates fetched through JavaScript API integration
- Sleek HTML/CSS design delivers accurate forecasts, customization settings, and responsive performance

Adventure Game

- Crafted with Typescript and Node.js
- Utilizes the 'inquirer' module
- Randomly selects enemies from an array, initiating battles that persist until one combatant is defeated

Quiz System

- Developed with Typescript and Node.js
- Integrates the 'inquirer' module
- Functioning akin to quizzes in Google Forms, concludes by displaying the score and prompts for another attempt
